# Executive Summary

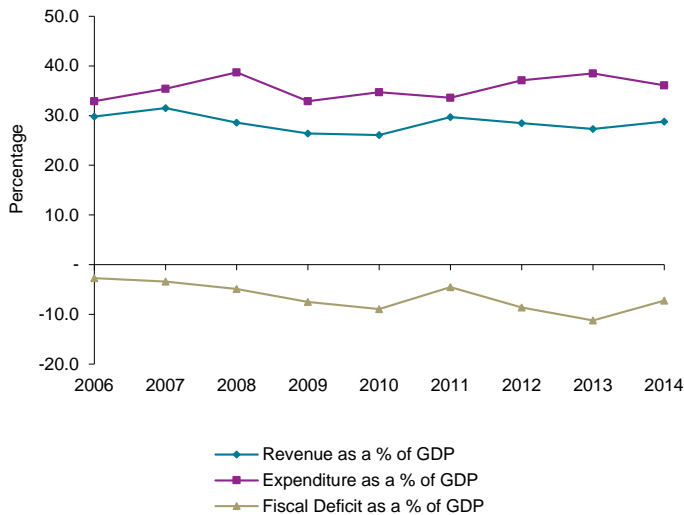

- The Minister of Finance and Economic Affairs, the Honourable Christopher Sinckler delivered the much anticipated Government's Financial Statement and Budgetary Proposals on Monday June 15, 2015. The Minister declared to the country that the home grown economic stabilization and recovery plan which was devised right here in Barbados (the Barbados Programme) is working. The primary objectives of the 19 month adjustment programme were to:
  - Restore and stabilize the foreign exchange reserves so as to be able to protect our fixed exchange rate;
  - Reduce the fiscal deficit to sustainable levels; and
  - Lay the foundation for returning the Barbados economy to a sustainable growth path.
- These objectives are consistent with the Medium-Term Fiscal Strategy ("MTFS") 2010-2014 dated January 2010 the aim of which over the medium term was to:
  - Reduce the overall fiscal deficit and generate a balanced budget by 2014/15 and a surplus by 2015/16;
  - Keep economic growth to acceptable levels by focusing on the foreign exchange earning sectors; and
  - Ensure a reduction in the debt ratios to sustainable levels.
- The Minister noted that based on a comprehensive review by the Division of Economic Affairs as at March 31, 2015 as a result of the programme, the Barbados dollar is safe, the fiscal deficit has been cut by nearly half and is well on the way to more sustainable levels, and a tourism-led recovery in the Barbados economy is underway. The Minister also said that the empirical results, which will shortly be reported, will show that not only was the Government able to meet the overall fiscal target but they were also able to turn around a primary deficit of \$385 million to a primary surplus of \$85 million dollars in one fiscal year.
- Regarding Government Revenues the MTFS policy was to:
  - Improve efficiency of existing revenue collecting agencies;
  - Carry out a comprehensive review of the existing tax framework;
  - Return the tax base to its relative size.
- As these policies to drive economic growth take effect, it is expected that revenues would benefit from the increased economic activity. From the proposals it appears the Government is projecting revenues of \$BD204.7 million from the improved efficiency per the MTFS and for tourism to be the leader of increased economic activity. In addition projected revenues are expected from the Energy sector via the aggressive facilitation of the build-out of an alternative energy sector. However, there appears to be no further commitment at this stage towards International Financial Services, Manufacturing or Agriculture.

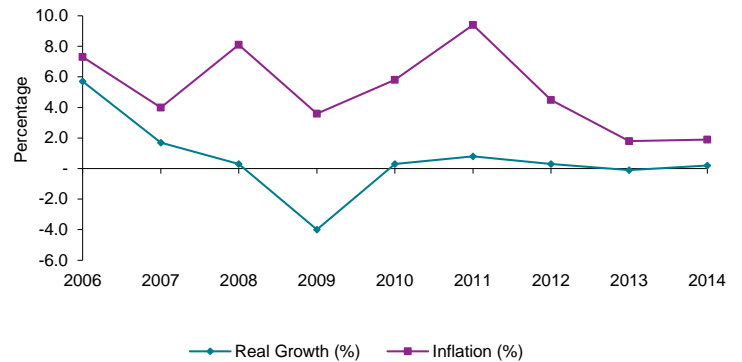

# Economic Overview

- Preliminary information received from the Accountant General indicated that current revenue for the fiscal period ended March 31, 2015 increased by 6.9% from the amount recorded for the corresponding period during 2014. Current expenditure decreased by 6.9% from the 2013/2014 figure, and the deficit was reduced to 6.8% of GDP at market prices. Now that the foundation for returning the Barbados economy to a sustainable growth path has been established, and consistent with the MTFS, the Government plans to push forward its medium term economic agenda to:
  - Achieve continued stabilization and growth of the International Reserves;
  - Reinvigorate and deepen economic growth to a minimum annual average of between 2.5 to 3.5% of GDP;
  - Reduce the fiscal deficit to be at least no greater than the rate of GDP growth by the end of fiscal 2017, and nearly balanced budget by 2020;
  - Achieve a primary surplus of at least 4% by the end of fiscal 2018 and thereafter annually of about 5%;
  - Establish and achieve a medium term debt anchor that uses the above outcomes to stabilize debt growth by 2018 and start the process of reducing the debt to GDP ratio to a target below 100% in the next five years.
- Some of the measures to be adopted include but are not limited to:
  - Facilitating Economic Investment - Public/Private Sector;
  - Facilitating the cost and ease of doing business in Barbados: “One Stop Shop”;
  - Introducing a Credit Bureau;
  - Launching a Competitiveness Commission; and
  - Continuing Legislative Reform.

Individual Taxation	<p><b>Key changes announced in the Budget</b></p> <ul style="list-style-type: none"> <li>The following deductions will be allowed along with the existing personal allowances; contributions to trade unions and statutory associations, donations to charities including the church, and energy audit retrofits.</li> <li>Other special credits such as foreign currency earnings allowance and double taxation relief will also remain in keeping with Treaty arrangements.</li> </ul> <p><b>Our view</b></p> <ul style="list-style-type: none"> <li>This measure will generate additional revenue for the government by reducing the number of allowances available to taxpayers. However it will also cause a decrease in the disposable income of individuals. The "Ounce of Prevention" tax credit on comprehensive annual medical examination introduced in the 2012 budget to encourage early detection and treatment of non-communicable diseases for persons over 40 years has been eliminated. The home (1996) and rental (2007) allowances, once thought to assist with the country's housing needs have been removed. It appears that the Government is seeking to eliminate refunds altogether.</li> </ul> <p><b>Summary of proposal</b></p> <ul style="list-style-type: none"> <li>This measure sees the elimination of deductions for investments in venture capital funds, medical expenses and home improvements including mortgage interest and insurance. While maintaining the capacity to generate considerable revenue, this measure is restrictive in nature and contrary to measures and motives expressed in prior budgets.
